

EyeBeam NVG™ (Night Vision Goggles)
LED swivel light with TOUCH sensing control.

The popular Aveo EyeBeam Touch™ capacitive sensing controlled cockpit and cabin lights are now available in NVG configuration that is they include green LED lighting compatible with night vision equipment. Also included with the NVG model EyeBeam is the standard selection faceplate locations of white, red and blue LEDs too, so whatever your operational conditions there is a lighting option to match it available from this amazing product.

With one light finger touch you can control power, white LED, red LED, green LED, blue LED or the brightness slider scale easily with no mechanical switches to fail and no bulbs to burn out. The EyeBeam comes with a variety of easily-applied colored faceplates so you can get the look you want, standard colors are black, silver or white, but volume orders for custom colors are always welcome. Standard aluminum colors available are anodized black or anodized silver.

The EyeBeam NVG™ also features as standard in its firmware automatic light dimming to OFF and automatic ON for the light when coupled to a door microswitch sensor. With a standard 2 minute delay programmed in.

Cockpit and cabin lighting, especially on aircraft, helicopters, boats, recreational vehicles and trucks are plagued by problems from vibration.... the EyeBeam overcomes this with a vibration-proof product that has the exclusive Aveo lifetime warranty.

Technical Information

- Power supply: 9-32 Volts
- Current consumption: 110 mA @ 12 Volts
- Capacitive Sensing Interface with LED backlighting
- 9 Incremental steps capacitive sensing slide bar for brightness adjust
- Swiveling Beam
- 2024 Anodized Aluminum Construction
- Available options, sold separately:
- Replacement faceplates (Select from 3 colors of faceplates: BLACK / WHITE / SILVER)
- Optional AveoRockRack™ LED laser engraved rocker switch
